0DETAILED ACTION

Continued Prosecution Application

1. The request filed on February 25, 2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/534,973 is acceptable and a CPA has been established. An action on the CPA follows.

Election/Restrictions

2. Claims 9-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 8.
3. This application contains claims 9-15 drawn to an invention nonelected with traverse in Paper No. 8. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by McCarron 964,044.

McCarron teaches a glass bottle comprising a body with a main part 1 having a closed end portion (not shown) and an open end portion 2, a secondary part 7 with a closed

end portion 5 and an open end portion (best shown in figure 2 adjacent shield 11), and a collar 4 located distant from any of the end portions listed above and at an angle between 60 and 180 degrees from a center line of the main container body. Regarding claims 2 and 3, the drawings depict the main part being well over 60 percent of the body, by default the main part would contain well over 60 percent of the glass.

Response to Arguments

6. Applicant's arguments filed May 17, 2002 have been fully considered but they are not persuasive. Applicants arguments directed to a rejection of the claims in view of Hall 246,879 is not understood. There is currently no rejection in view of this reference. Applicants arguments directed to the deficiencies of the prior art of McCarron 964,044 is not understood. The structure of McCarron which is equivalent to the claimed structure of applicants invention is clearly pointed out above in the rejection. Applicant has failed to add any structural limitation which would define the claimed invention over the prior art as applied.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners.
